WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

One blank folded into an open box 90 wide, 76 deep, 340 tall: back, two sides, two ends; 10 mm tabs on the ends rivet to the sides. 8 mm flanges folded inward round the open front (the lid side). Heights from the connector face; left and right seen from the lid. Back: pawl slot 37 x 25, 282.5 to 307.5 up; six 4.1 rivet holes at 25 each side, 290, 310, 330 up; holder screws 2.7 at 25 right and 37 left, 60 and 240 up. Countersink all from outside. Top end: slider slot 31 x 5.5 against the back wall; two 5.5 handle holes at 36.5 each side, 32 in from the back face. Connector face: lead opening 42 x 22, 21 to 43 in from the back face; four 3.4 plug screw holes (see the build plan). Right side: four 2.7 BMS holes, 8 and 58 from the back face, 80 and 260 up, countersunk outside so the face stays flat. Flanges: eight 4.2 holes for M3 press-in nuts, 5.5 in from each side, 30, 125, 215, 310 up. Seal the corner seams.
