WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print two frames 6 thick, 59.5 deep and 300 tall, lying flat.

26 pockets 21.2 dia through, two rows at 25.5 and 47.5 in from the back edge, 13 pockets per row at 22 pitch, the first 18 up.

Print one plain (left) and one with a notch 6.5 deep from the back edge over the top 44.5 mm (right), which clears the latch.

Two M2.5 heat-set inserts in the back edge of each, 40 and 220 up from its bottom, on the frame's centre line.

Fit: one frame 1 mm in from each end of the cells; cells pushed in until 1 mm stands out for the nickel strip. The back edges rest on the tray back wall, held by two M2.5 countersunk screws each from outside the tray.

Check: the cells sit square and do not turn by hand.

SWAPCELL
