WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 50 long from 12 x 8 flat bar; square and deburr.
The bottom face is the latching face: keep it flat and square.
Two M5 tapped holes 7 deep in the back face, 16 each side of centre, half way up.
Fit: back face flat on the plate front, centred, 544 up from the plate bottom; two M5 countersunk screws from behind.
It stands 8 out from the plate and ends 2 from the pack's back.
With the pack seated, the pawl sits 1 below it, overlapping 4.
Check: lift the seated pack by its handle: the pawl stops it.

SWAPCELL
